

14. Automation & Searchable Record Data Dictionary

The accompanying Student Master Register workbook is the initial searchable in-house system. Use one row per permanent student in the Students sheet and one row per course/qualification in the Qualifications sheet.

Field	Required Use
Student Number	Permanent unique key; format DJSTA-YYYY-#####.
Legal Name	Searchable legal name; retain prior names only when necessary.
DOB	Identity disambiguation; restrict access.
Phone / Email	Contact and renewal reminders.
Course Record ID	Unique transaction key; format QR-YYYY-#####.
Course Code	Standardized list, e.g., NJPTC, CCARE, BP, CCW.
Qualification Date	Date training/qualification occurred.
Result	Pass, Fail, Incomplete, Remediation.
S.P. 182 Filename	Exact digital file name.
Certificate Number	Unique certificate identifier.
Target Evidence	File name or secure link.
Next Review Date	Automation trigger for renewal outreach.
Record Status	Active, Archived, Do Not Contact, Duplicate Review.

Access control: limit medical, date-of-birth, identification, waiver, and legal-screening records to personnel with a legitimate business need. Maintain encrypted backups and a documented correction/duplicate-record process.
